

1 Manual for Maxi-cosi holder on bench

Step 1: Mount the mounting brackets on the bottom mount with the 4 included nuts and bolts

Step 2: Place the assembly on the bench and decide the best position for the holder.

Note: when you want to have a child sit next to the Maxi-Cosi (holder), place the Maxi-Cosi further to the side of the bench. Try out the position before you start drilling the holes. As seen in the image to the left. The Maxi-cosi is mounted all the way in the left of the bench to save as much space as possible for a second passenger. There are different sizes of Maxi-cosi's so the amount of space that remains depends on the child and the Maxi-cosi.

If you're also using a tent, place the Maxi-cosi holder in the middle of the bench, otherwise the tent will not fit anymore.

Step 3: Mark and drill holes in the seat and backplate in. While marking the holes, make sure the bolts will not hit the steering tube.

Step 4: Put in the supplied bolts and tighten them securely

Step 5: Attach the Maxi-Cosi to the mounting frame.
